

Important Information About Your Drinking Water
Monitoring Requirements Not Met For
Atascosa Rural WSC

Our system failed to collect every required coliform sample. Although this incident was not an emergency as our customers have, you have a right to know what happened and what we did to correct this situation.

We are required to monitor your drinking water for specific contaminants on regular basis, results of regular monitoring are an indicator of whether our drinking water meets health standards. During January we did not complete all testing for coliform bacteria and therefore cannot be sure of the quality of your drinking water during that time.

What should I do?

There is nothing you need to do at this time you may continue to drink the water. If a situation arises where water is no longer safe to drink, we are required to notify you within 24 hours.

What is being done?

We collected every required coliform sample in February 2026 and are no longer in violation. For more information, please contact Atascosa Rural Water Supply at 210-622-3901 or 10882 Jarratt Rd Atascosa TX 78002.

Please share this information with all other people who drink this water, especially those who may not have received this notice directly.
